EDUCATION

Don Bosco Institute of Technology (DBIT) — *B.E. Computer Engineering, Mumbai University 2025 – 2029*

- Currently in Second Year — CGPA: 8.5 (First Year)
- 12th (HSC): 84% | 10th (SSC): 85%

TECHNICAL SKILLS

Languages: Python, C, C++, Java (in progress)

Web & Frameworks: React.js, Node.js, Express, Flask, HTML5, CSS3, Tailwind CSS, JavaScript

Databases & Tools: SQLite, SQL, Git/GitHub, Render, Turso, Chart.js

AI/Applied Interests: Anthropic API integration, linear regression forecasting, sentiment analysis pipelines

PROJECTS

Energy Demand & Price Predictor — *React.js, Django, Chart.js, Linear Regression*

2025

- Built a forecasting dashboard predicting energy demand and price trends using a linear regression model, visualized with Chart.js
- Presented the project at the InnoQuest 2025–26 exhibition at DBIT
- Team project

FinWise — Personal Finance App — *Flask, SQLite, Anthropic API, HTML/CSS/JS*

2026 – Present

- Developing a full-stack personal finance tracker with an AI-assisted insights layer using the Anthropic API
- Handled end-to-end deployment, including backend API key configuration and environment setup

Sunrise Public School — Management System Redesign — *Node.js, Express, SQLite, Tailwind CSS*

2026

- Redesigned a multi-page school management system with a cohesive dark UI (glassmorphism, custom accent theme) while preserving all existing JavaScript logic
- Deployed the application to Render using Turso for cloud-hosted SQLite

2026

AI-Enhanced Notes App — *Full-stack, AI integration*

- Built a notes application with AI-assisted features for organizing and summarizing content

2025

TREND-PULSE: AI Sentiment & Insight Bot — *Team project — Syntax Squad*

- Contributed to an AI-driven sentiment analysis tool

LEADERSHIP & INVOLVEMENT

- Contributor to the college newsletter/magazine team at DBIT

ADDITIONAL COURSEWORK & INTERESTS

- Strong academic foundation in Mathematics; coursework spans Environmental Studies, Engineering fundamentals, and core CS subjects
- Enjoys experimenting with new technologies through self-directed side projects and exploring UI/UX design principles
